

LOVE YOUR KITCHEN AGAIN CREATE A NEW LOOK WITH CUSTOM REFACING

SAVVY HOMEOWNERS ARE DISCOVERING that it's a much better investment to reface their cabinets than replace them. More than 90% of homeowners remodeling their kitchens plan to keep the layout basically the same. If your existing kitchen is well designed, well built, and functional, you already have more than half of what you need for your new kitchen, and there is really no reason to tear the cabinets out.

Think about it-- most of what you see in your kitchen is doors and drawer fronts. You sacrifice nothing with cabinet refacing -- the installation typically takes just 3-5 days. Refacing cabinets is just like designing brand-new cabinets; choose any hardwood specie, in any color or finish of your choice. Combine new quality solid hardware and accessories, and the possibilities are limitless.

By using the same premium, durable materials and craftsmanship that is found in the most expensive kitchens today, you can create a kitchen that is beautiful, stylish and operational in a fraction of the time and costs of traditional remodeling. When saving up to 60% off the cost of a full kitchen remodel, you can afford to upgrade countertops, flooring, and appliances.

Every Kitchen and Client has unique needs and

requirements. As a result, you look for a certified, experienced staff with award winning designs to make your dreams reality. Beyond refacing Let's Face It offers a wide array of countertops from granite and stone, to beautiful high- pressure laminates as well as flooring, lighting and much more.

Unless you're planning to change your entire floor plan, there is no need to replace just reface. For more than 25 years, Let's Face It has provided homeowners with this high quality alternative to extensive remodeling projects. Locally owned and operated by David Cerami, Let's Face It serves the Delaware Valley area. Call 1-800-795-1131 or visit them online at www.LFIkitchens.com
